

Foreword

Congratulations on taking up the hobby of homebrewing!

With some simple procedures, and scrupulous attention to cleanliness, you can turn out tasty beers, at a fraction of the cost of the beers you buy.

You may have decided that the commercial mainstream beers available just do not have enough flavor, body or variety. Your homebrew, especially where you supplement a can of beer concentrate with malt extracts or Brew Improver Packs, will have much more taste.

Beer concentrates are but the first step into home brewing. You can move to incorporating grains, extracts, hops, liquid yeasts and generally progress in the hobby.

The Jovial Monk stands ready to help you at every step of the way.
